

Strong exhaust silent generator

What is the quietest diesel generator?

Our range of Super Silent Diesel generators are some of the quietest generators on the market today. Thanks to our revised canopy design, our range of Super Silent Diesel generators can produce a noise level of up to 58dba at 1m. To put that into perspective, from 1 metre away these Super Silent generators will sound like an idling Diesel car.

What is a silent diesel generator?

Silengen produces Ultra Silenced diesel generators. This is a line of low acoustic impact Generators, designed to allow the use of diesel generators in every single environment where noise cannot be tolerated, e.g. during the night. One of the limits of traditional power Generators is their noise level.

What is a Super Quiet Generator?

They are perfect for inner-city use, residential back-up and entertainment sectors in key development areas in the UK & Europe. These Super Silent Generators stand out as some of the best and quietest on the market today, offering unparalleled value and performance.

Why should you buy an ultra Silent Generator?

With an Ultra Silent Silengen, you will be able to keep a generator operative 24H/24H, without creating any discomfort and without hearing annoying noises. That is possible because Silengen has a residual noise level very close to the one of a typical household appliance. Noise is considered as the cause of stress and insomnia.
