

# Tariffs on solar racks in the United States

What are solar panel import tariffs?

Solar panel import tariffs are primarily intended to support the development of a new U.S.-based solar module manufacturing supply chain, which is financially backed by the Inflation Reduction Act. This act introduces a series of tax credits designed to bolster domestic manufacturers. For solar modules, the credits are as follows:

Did Obama impose tariffs on Chinese solar panels?

Recent US presidential administrations from both parties have levied tariffs on imported solar panels. In 2012, the Obama administration imposed tariffs on Chinese solar manufacturers under anti-dumping and countervailing duty (AD/CVD) laws.

What tariffs did Trump impose on solar panels?

Following lawsuits by Suniva, the Trump administration implemented two additional tariffs: Section 201 & Section 301, applying to solar modules and hundreds of other items, respectively. The Section 201 tariff imposed a 30% import tariff on all solar modules from all countries, decreasing 5% annually until its scheduled end.

Why are US tariffs on solar panels coming to Southeast Asia?

Nov 29 (Reuters) - U.S. trade officials announced on Friday a new round of tariffs on solar panel imports from four Southeast Asian nations after American manufacturers complained that companies there are flooding the market with unfairly cheap goods.

Will the US impose a tariff on solar energy in 2024?

Now, in 2024, as the solar industry strives to fully scale and establish itself, the U.S. has imposed five import tariffs, one geographical import ban, and has also recently initiated an additional tariff case now under investigation.

Why are US solar tariffs affecting global solar prices?

The U.S. tariff decisions follow a surge in Chinese exports which have driven down global solar prices and raised fears over the future of U.S. and European solar manufacturers. Global panel prices fell almost 50% last year, according to the International Energy Agency (IEA).

Since the passage of the US Inflation Reduction Act in 2022, which contained rich incentives for clean energy manufacturing, multinational solar manufacturers have begun to move operations into the United States. In 2023, Trina Solar, Canadian Solar, and Longi all announced 5 GW solar module manufacturing facilities, potentially adding a ...

Solar energy trade shows are considered the most important shows for the renewable energy sector. Solar Energy Trade Shows: A Comprehensive Guide ... their value, and the applicable tariff rates. The Harmonized
