The 40.5 MW Jännersdorf Solar Park in Prignitz, Germany. A photovoltaic power station, also known as a solar park, solar farm, or solar power plant, is a large-scale grid-connected photovoltaic power system (PV system) designed for the supply of merchant power. They are different from most building-mounted and other decentralized solar power because they supply ...

Systems are rated in kilowatts peak (kWp). This is the maximum rate of electricity the array of panels could generate at peak performance, e.g. noon on a sunny day with the panels facing south. Kilowatt-hours (kWh) is the actual electricity ...

A PV panel, also referred to as a solar panel, is comprised of photovoltaic solar cells connected in a series. PV panels are installed on the rooftop where they absorb photons (light energy) to generate electricity. PV panels are connected in a string to form a complete solar-power-generating unit called a PV array.
