

The photovoltaic panel bracket has an adjustable angle

What is an adjustable tilt solar panel mounting bracket?

An adjustable tilt solar panel mounting bracket is a device that allows you to mount an adjustable angle on your solar panels so they can be tilted for maximum sunlight. This is an important product to have as it allows you to optimize the amount of solar energy your panels produce, giving you the most energy for your home or business.

What size solar panels can be mounted on a roof?

Suitable for up to 150w Solar Panels (max solar panel width around 700mm), solar panel length not relevant as the brackets can be moved further apart. Can also be used on roofs, sheds, garages or other flat surfaces to tilt solar panels. Also suitable for ground mounting solar panels.

Why should I Tilt my solar panels?

Gain up to 25% more solar panel efficiency by tilting your panels towards the sun instead of laying them flat. This is especially beneficial over winter months when there is less sunlight. Suitable for up to 150w Solar Panels (max solar panel width around 700mm), solar panel length not relevant as the brackets can be moved further apart.
