Where can I find information about solar panel grounding?

Your local electric utility company or a qualified electrician can provide you with more information about solar panel grounding. Now that you know how to install, maintain, and troubleshoot ground solar panels, you can start saving money on your energy bills.

How do you ground a solar racking system?

Now, you'll connect your solar panels and racking to the grounding wire: If your racking system is UL-listed for bonding, connect the grounding conductor to one rail in each row. If not, attach a grounding lug to each panel frame and racking component. Connect these lugs to your main grounding wire.

Why is proper grounding of a photovoltaic power system important?

Proper grounding of a photovoltaic (PV) power system is critical to ensuring the safety of the public during the installation's decades-long life. Although all components of a PV system may not be fully functional for this period of time, the basic PV module can produce potentially dangerous currents and voltages for the life of the system.

Do solar panels need to be grounded?

Section 250 of the NEC specifically deals with grounding electrical systems, including solar panel installations. Key points from the NEC: The code requires all non-current-carrying metal parts of the solar PV system to be grounded. It specifies the minimum size of grounding conductors (more on this later).

Does a photovoltaic system have a DC grounding system?

Photovoltaic systems having dc circuits and ac circuits with no direct connection between the dc grounded conductor and ac grounded conductor shall have a dc grounding system. The dc grounding system shall be bonded to the ac grounding system by one of the methods in (1), (2), or (3).

Why do PV systems need a grounding system?

As installed PV systems age, grounding issues emerge that impact system safety. These issues include deteriorating electrical connections, inadequate grounding device design and installation, and the effects of non-code compliant system installations.
