

Trina Photovoltaic Panel 550w

What makes Trina Solar 550W PV modules unique?

Trina Solar 600W/550W PV modules took advantage of Trina Solar's multi-busbars technology, low-voltage, high-current design, and advanced technology solutions such as non-destructive cutting and high-density cell interconnect technology.

Why is Trina Solar 600w/550w series a good choice?

There are mainly two reasons that Trina Solar's 600W/550W series modules contribute to the outstanding resistance to hot-spot effect. Firstly, the 600W/550W series uses the most advanced cells production line, which holds the highest cells manufacturing standards in the industry. The leakage current I_{rev} is minimized.

What is Trina Solar 415w?

Trina Solar 415W is a monocrystalline module with a 20.4% efficiency, which is a long stretch ahead of what conventional panels have to offer. Trina Solar 415W has a low temperature coefficient of -0.36%, which means that the module's efficiency decreases just 0.36% for every 1.8°C above 77°F. This helps to maximize the final energy output.

How much power does a Trina Solar panel produce?

The TallMax 5BB, 385-410W - TSM-DE15H (II) can achieve up to 410W with a 20.2% efficiency, and the TallMax 345-385W - TSM-DE14H (II) can attain a 385W output with a 19.9% efficiency. The high efficiency and power output of Trina Solar panels means that homes don't need many panels on the roof.

Are Trina Solar panels a good choice for residential installations?

Trina Solar panels are a good choice for residential installations as they offer high production levels and reliability. The 360W panel boasts a 19.5% efficiency, which is achieved through the usage of half-cut cell design and Multi Busbar technology.

What makes Trina Solar unique?

On the basis of its superior multi-busbar technology, Trina Solar's research and development team has introduced an innovative design that integrates non-destructive cell cutting and high-density interconnection technologies. The multi-busbar technology, with the capability to increase light absorption, is a perfect match with the large-area cell.
