Solar panels may be mounted on a pole, a ground support, a wall of a building, a building or vehicle roof, or on a boat deck. The main considerations are day long access to unobstructed sunlight and wire lengths to batteries. Appearance and ease of access for any cleaning etc. should also be considered.

In conclusion, while wall-mounted solar panels may not always match the total annual output of roof-mounted systems, they offer unique advantages in certain climates and seasons. Their ability to capture low-angle winter sun and resist snow accumulation can make them an efficient choice, especially in northern latitudes or areas with limited roof space.
