

# Where to complain about rural solar power generation

How do I register a complaint with the Energy Ombudsman?

You can register your complaint to the energy ombudsman: Find out more about registering your complaint with the energy ombudsman on their website. If you need to communicate in a different way, for example using braille or a different language, you can check accessibility options on the Energy Ombudsman website.

When can I complain about my energy supplier?

You must complain to the ombudsman within 12 months of your supplier telling you their decision. If your supplier hasn't given you a decision you might have longer than 12 months, but it's still worth complaining as soon as you can. You can register your complaint to the energy ombudsman:

What if I have a problem with my energy supplier?

If you have a problem with your energy supplier or network operator, contact them and explain what you would like them to do to make it right. They should have a formal complaints procedure process on their website or on your energy bills that explains how to do this.

Who can I contact if I have a problem with my electricity?

Depending on what the problem is, you can complain to either your energy supplier (the company that provides your energy) or network operator (the company responsible for the pipes and wires that carry electricity and gas). If you are not sure who to contact, follow the instructions on our Find your energy supplier page.

Should solar sites be classified as agricultural land after decommissioning?

needed to inform decisions. f. Avoids the site being classified as brownfield after decommissioning: Planning conditions should require that solar sites continue to be classified as agricultural land throughout their life so their st

How do I register a complaint?

Registering a complaint by post If you are unable to register a complaint online for any reason, the complaint registration form can be posted on request. Please contact the Dispute Resolution Team on 0207 981 0850.

Having solar power as the primary energy source to homes and establishments in these areas means having lower chances of losing electricity, regardless of the weather. Since solar batteries are designed to store energy for later use, it helps balance electricity generation and demand, making solar a more reliable energy source than traditional ...

Solar on Farmland. Although solar development will be distributed nationwide, large utility-scale projects will be concentrated in areas with favorable siting and interconnection opportunities. The ideal location for installing a solar power facility is on land that is clear, dry, relatively flat and close to existing grid
