

Why doesn't anyone steal solar panels

Are solar panels stolen?

By way of example, in August, solar panels worth approximately £10,500 were stolen from an energy farm in Northamptonshire. Solar panel theft is not limited to large scale and commercial solar farms either - homes in remote areas are also vulnerable, with thieves reportedly swiping panels from people's roofs. Why?

Are solar panels causing a rise in solar crime?

A rise in solar crime means eco-conscious homeowners and farmers who have diversified into renewables should check their security and insurance. The warning comes after police figures revealed a 48 per cent rise in solar panel and cabling theft from 2021 to 2022.

Are solar panel thefts a crime?

Organised criminal gangs tend to rely on familiar methods for committing solar panel thefts, and their movements can often be predicted. By paying attention to advisories issued by law enforcement and local media reports, site operators can identify times and locations that are at high risk for theft.

How to protect solar panels from theft & vandalism?

This approach can be a cost-effective way to protect solar panel systems and deter criminal activity. Like other valuable assets, solar panels must be protected from theft and vandalism as much as possible. One effective way to do this is by installing physical barriers that make it difficult for thieves to remove panels from the site.

What should I do if my solar panels are stolen?

Ensure your homeowner's insurance policy covers your solar panels in case of theft. Some solar panel owners choose to install GPS tracking devices on their panels, allowing them to be tracked and located if stolen. Ensure your solar panels are professionally installed.

Is solar theft a problem in the UK?

Rural theft has long been an issue in the UK. It is a sinister practice, with repercussions that are as much emotional, as they are commercial. After all, for a small farm, solar panels are a huge investment. Not only that, but if solar theft is not brought under control, it will delay the country from reaching its net zero goals.
